

MOMAP's Task Management System

Intro to Programming

CMPT 120L - 114

Professor Reza Sadeghi

Fall 2024

TABLE OF CONTENTS

-
1. WHO IS MOMAP? (3)
 2. PROJECT OBJECTIVES & DESCRIPTIONS (4-5)
 3. GRAPHICAL USER EXPERIENCE DESIGN (6-11)
 4. VIRTUAL ENVIRONMENT (12)
 5. DATA STORAGE (13)
 6. USER INTERFACE DESIGN (14-20)
 7. IMPROVED USER INTERFACE DESIGN (21-27)
 8. LIVE DEMO (28)
 9. REFERENCES (29)

1. WHO IS MOMAP?

Olufunke Gando (Team Member)

GRADE: Freshman

MAJOR: Computer Science

CONCENTRATION: Software Development

Anna Chen (Team Member)

GRADE: Junior

MAJOR: Business Administration

CONCENTRATION: Marketing & Management

Marissa Ratschki (Team Head)

GRADE: Sophomore

MAJOR: Cybersecurity

CONCENTRATION: N/A

Prashna Khadka (Team Member)

GRADE: Freshman

MAJOR: Computer Science

CONCENTRATION: Software Development

Marlene Santiago-Cuevas (Team Member)

GRADE: Freshman

MAJOR: Computer Science

CONCENTRATION: Software Development

2. PROJECT OBJECTIVES & DESCRIPTIONS

The system will support the following features:

- An admin username and password for log-in
- Option to change the admin username and password
- Normal username and password
- Removal of normal user by erasing login credentials

Each user will be able to:

- Add a task to the Task Management System
- Remove a task
- Edit a task
- Search for a task

2. PROJECT OBJECTIVES & DESCRIPTIONS

The system will utilize a user-friendly software:

- Show a welcome page and a menu of all functions available to the user
- Display a calendar for every month or year
- Display a warning whenever the users attempts to enter task information with a name that is already in use
- Have an exit function

The system will protect user information:

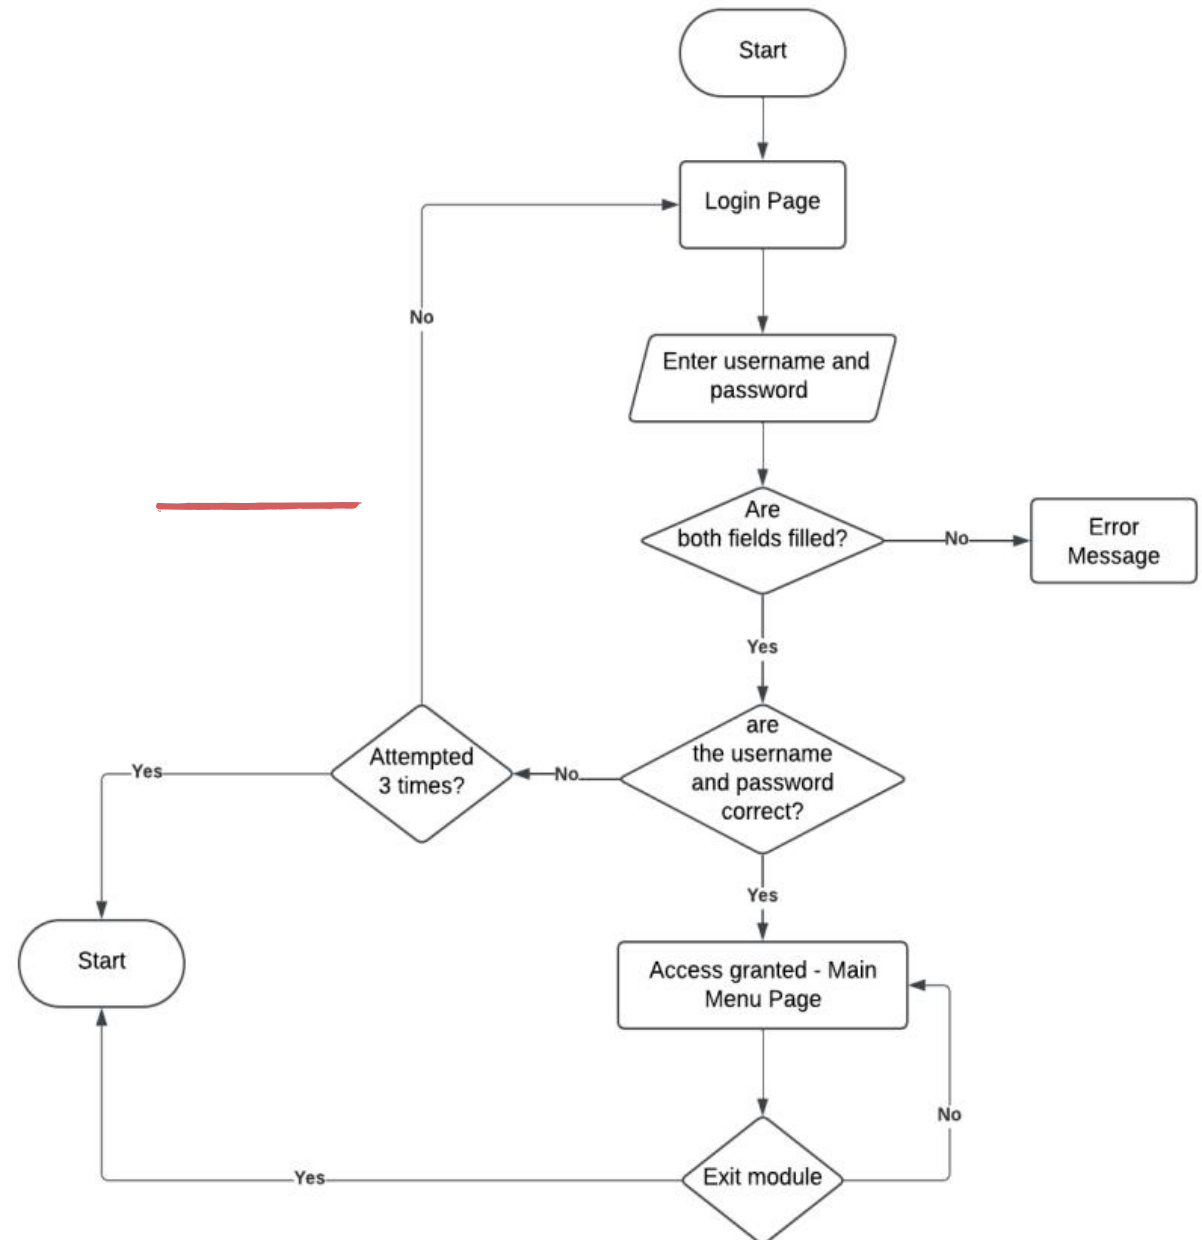

- Information provided will be ciphered using a Caesar cipher

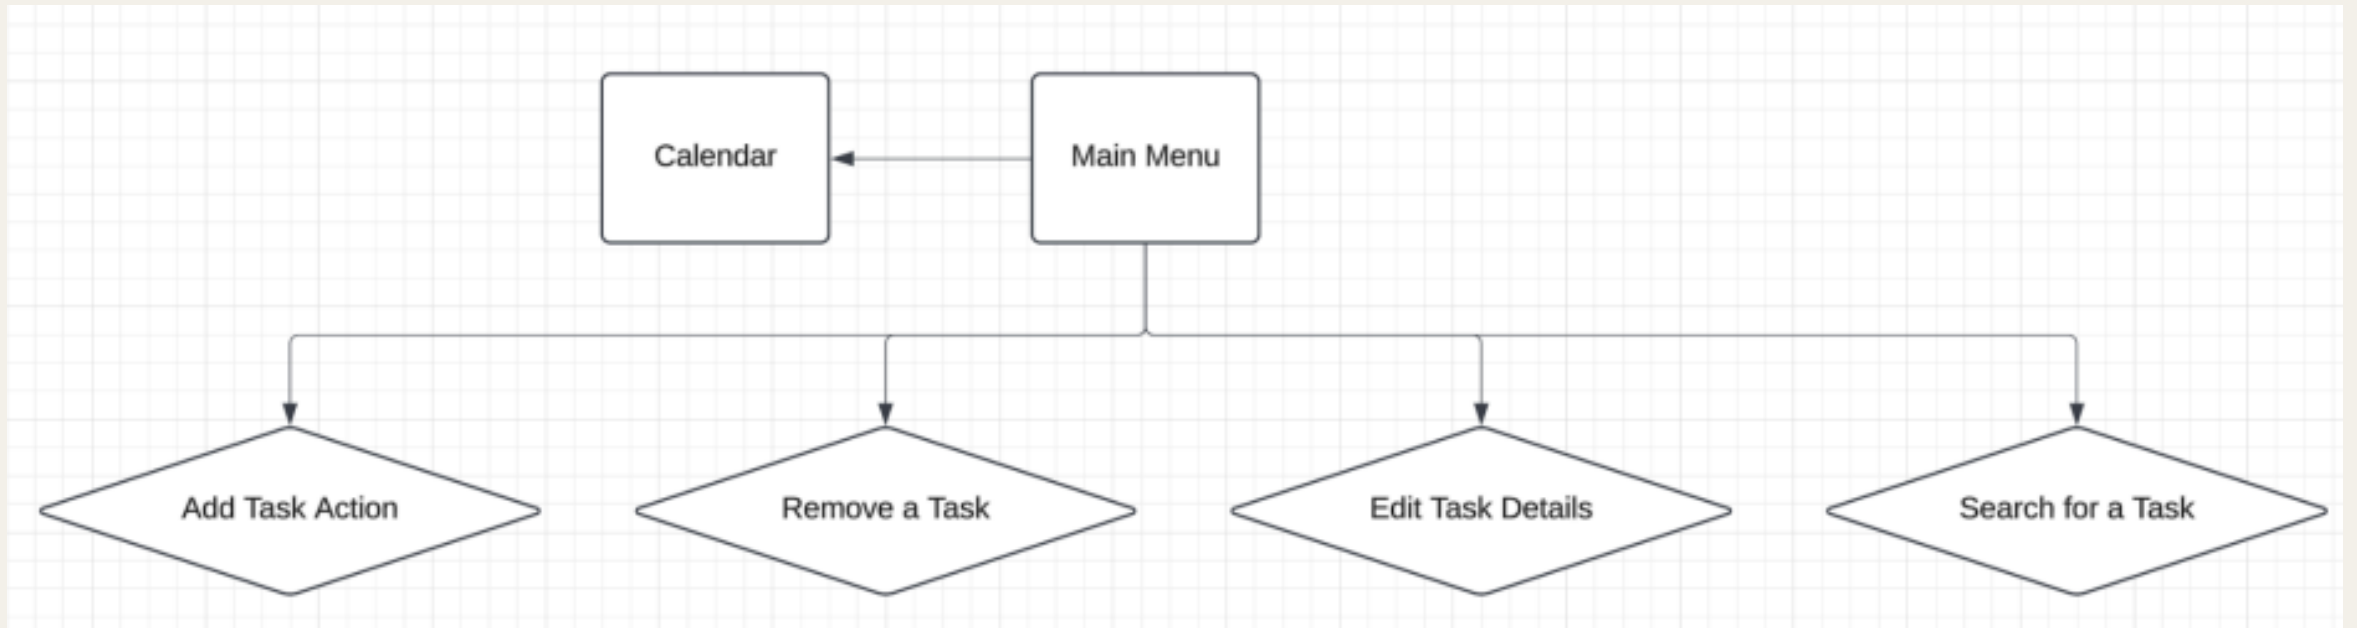

3. GRAPHICAL USER EXPERIENCE DESIGN

4. *Virtual Environment*

```
Last login: Tue Nov  5 21:42:15 on ttys001
[annachen@148-100-170-111 ~ % sudo pip3 install virtualenv
[Password:
WARNING: The directory '/Users/annachen/Library/Caches/pip' or its parent directory is not owned or is not writable by the current user. The cache has been disabled. Check the permissions and owner of that directory. If executing pip with sudo, you should use sudo's -H flag.
Requirement already satisfied: virtualenv in /Library/Frameworks/Python.framework/Versions/3.12/lib/python3.12/site-packages (20.27.1)
Requirement already satisfied: distlib<1,>=0.3.7 in /Library/Frameworks/Python.framework/Versions/3.12/lib/python3.12/site-packages (from virtualenv) (0.3.9)
Requirement already satisfied: filelock<4,>=3.12.2 in /Library/Frameworks/Python.framework/Versions/3.12/lib/python3.12/site-packages (from virtualenv) (3.16.1)
Requirement already satisfied: platformdirs<5,>=3.9.1 in /Library/Frameworks/Python.framework/Versions/3.12/lib/python3.12/site-packages (from virtualenv) (4.3.6)
WARNING: Running pip as the 'root' user can result in broken permissions and conflicting behaviour with the system package manager, possibly rendering your system unusable. It is recommended to use a virtual environment instead: https://pip.pypa.io/warnings/venv. Use the --root-user-action option if you know what you are doing and want to suppress this warning.
annachen@148-100-170-111 ~ % python3 -m venv MOMAP
annachen@148-100-170-111 ~ % source MOMAP/bin/activate
(MOMAP) annachen@148-100-170-111 ~ %
```

5. DATA STORAGE

- Username and password are saved and stored in "users.txt" file
- Every task created by user is saved and stored in "tms_tasks.txt" file

```
def load_users(self): # loads users stored in the text file
    try:
        with open("users.txt", "r") as file:
            for line in file:
                username, password = line.strip().split("|")
                if username not in users:
                    users[username] = {"password": password, "tasks": []}
            print(f"Loaded users: {users}")
    except FileNotFoundError:
        print("No user file found.")
```

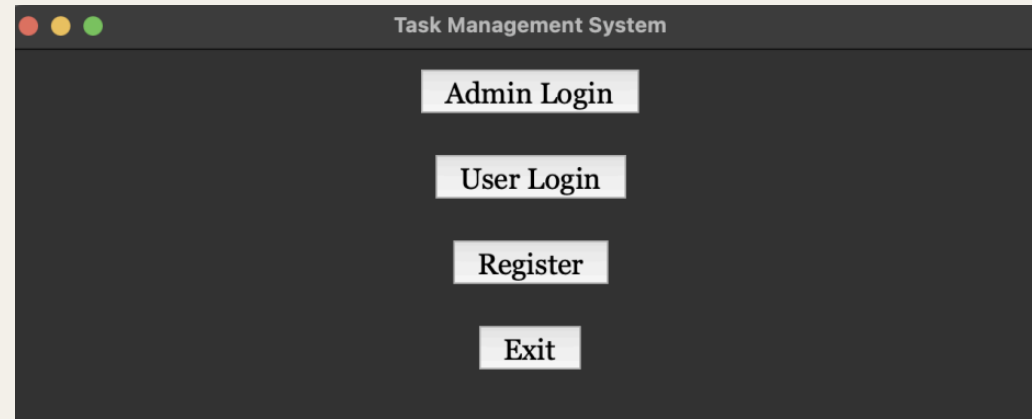

```
def save_users(self):
    try:
        with open("users.txt", "w") as file:
            for username, data in users.items():
                file.write(f"{username}|{data['password']}\n")
            print("Users saved successfully.")
    except Exception as e:
        print(f"Error saving users: {e}")
```

```
def load_task(self):
    print("Loading tasks...")
    try:
        with open("tms_tasks.txt", "r") as file:
            for line in file:
                user, title, time, duration, description = line.strip().split("|")
                if user not in users:
                    users[user] = {"password": "", "tasks": []}
                users[user]["tasks"].append({
                    "title": title.strip(), # strips invisible characters
                    "time": time.strip(),
                    "duration": duration.strip(),
                    "description": description.strip()
                })
            print(f"Users from task list: {users}")
    except FileNotFoundError:
        pass
    print("No tasks found")

def save_task(self):
    print("Saving tasks to tms_tasks.txt")
    try:
        with open("tms_tasks.txt", "w") as file:
            for user, data in users.items():
                for task in data["tasks"]:
                    print(f"Saving task: {task}") # confirms task data is saved
                    file.write(f"{user}|{task['title']}|{task['time']}|{task['duration']}|{task['description']}\n")
            print("Task saved successfully")
    except Exception as e:
        print(f"Error saving task: {e}")
```
